

Our family listens to K-Love on FM90.3 every day. It is the only FM radio station we listen to as a family. The station provides us with music we all enjoy. In addition to the contemporary music enjoyed by our 4, 10 and 13 year old children the station provides national and local news items that as a parent I trust will not be offensive or too graphic for young ears. If this station is replaced by a LPFM priority station our family will not longer have a radio station we can all listen to and enjoy.

K-Love while a national station also provides information on local activities such as holiday musicals, and concerts that we have taken our children to. They offer the Christian perspective on many issues that affect our lives every day. If the FCC changes the rules for LPFM sations and allows these stations to take priority over current FM tanslator stations our area will loose an important broadcast service.
